

1. Design a website for a college. There should be at least 15 webpages present in the website. There should be:

- One Home page that leads to other pages. The Home page should contain the name of the college as heading along with the college logo. There should be a tab with the following links:

- Home;
- Academics;
- Admission;
- Gallery.
- There should be an appropriate description of the college on the home page.

- One Academics page which contains a list of all the departments present in the college such as Arts, Science and Commerce. The list should be a nested list, with available courses mentioned under each department. There should be a minimum of two courses under each department, (for e.g. Computer Science and Mathematics under Science, English and Sociology under Arts and so on). Each Course entry in the list should be a HTML link that leads to a webpage totally dedicated to the course itself.

- Each Course should have its own dedicated webpage. This page should contain a description about the course, a list of all the teachers taking the course and the timetable for that particular subject.

- The Admission page basically contains a form that a student needs to fill up in order to take admission in the college. The form should ask all the necessary questions using appropriate form elements.

- One gallery page that contains set of photos taken of the college and its students. Please note that each webpage in this website should have the same background Image/color. The looks of each page should be similar.

2. Design a website for the Tourism Sites of a given City. There should be at least 15 webpages present on the website. There should be:

- One Home page that leads to other pages. The Home page should contain the name of the city as heading along with a logo. There should be a tab with the following links:
 - Home;
 - Heritage;
 - Hotel Booking;
 - Gallery.
- There should be an appropriate description of the college on the home page
- One Heritage page which contains a list of all the Heritage Sites present in the city. The list should be a list of Pictures. There should be a minimum of ten heritage sites. Each Image entry in the list should be a HTML link/button that leads to a webpage totally dedicated to the Heritage Site itself.
- Each Heritage Site should have its own dedicated webpage. This page should contain a description about the site along with its history.
- The Hotel booking page basically contains a form that a person needs to fill up in order to stay in a hotel. The form should ask all the necessary questions using appropriate form elements.
- One gallery page that contains set of photos taken of the Heritage Sites throughout the city.
